097-148-2351

Highly motivated Full-Stack Developer and recent Information Technology graduate, specializing in AI integration and scalable web architecture. Experienced in building robust applications with Next.js and Django, with hands-on expertise in implementing LLMs, RAG pipelines, and vector databases. Dedicated to combining solid software engineering practices with cutting-edge AI technologies to deliver highly functional, production-grade automated systems.

Projects

Jisa

Built an end-to-end manga translation system using FastAPI, OpenCV, PyTorch, and Ollama OCR/translation APIs to automate speech bubble detection, text extraction, text removal, and Thai text rendering while preserving original page composition.

Nextmart

Developed a full-stack e-commerce platform with product catalog, shopping cart, checkout flow, and JWT authentication. Built admin workflow for product management, order updates, and shipping status tracking.

SeeU Bangkok

Built a full-stack AI travel planning platform by integrating Next.js, Hono, Supabase, Mapbox, and Langgraph, enabling users to discover Bangkok places, generate itineraries, save trips, and explore recommendations through an interactive map and chatbot.

Core Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS

Backend: Node.js, Django, Hono, Python, FastAPI

Database: PostgreSQL, MySQL, SQLite, Supabase

Tools / DevOps: Git, GitHub, Docker, Vercel, Netlify, AWS, Linux

AI : LangChain, LangGraph, Codex, Claude Code, Windsurf, Cursor, Ollama

Education

King Mongkut's Institute of Technology Ladkrabang

B.Sc. Information Technology

Languages

Thai (Native), English (TOEIC 780)
