

JARUVIT JONGCHEAKLANG

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Bangkok, Thailand | 092-534-6862 | jaruvit.rpg@gmail.com | Portfolio: <https://heartnet123.github.io> |
GitHub: github.com/heartnet123

SUMMARY

Recent B.Sc. in Information Technology graduate specializing in software engineering, full-stack development, and AI-integrated product features. Proficient in leveraging AI-assisted development tools and coding assistants to accelerate development and improve code quality. Hands-on experience building RAG/LLM-powered workflows, REST APIs, relational data models, authentication systems, responsive customer-facing interfaces, and Dockerized services. Committed to writing clean, maintainable code, contributing to production-ready codebases, aligning technical solutions with product requirements, and continuously improving through feedback and code review.

TECHNICAL SKILLS

Frontend: React, Next.js, HTML, CSS, Tailwind CSS, Astro, SvelteKit, Vue.js
Backend: Python, TypeScript, JavaScript, FastAPI, Django REST Framework, Node.js, Hono, REST API
Database: PostgreSQL, Supabase, MySQL, SQLite, Convex, relational schema design, vector databases, pgvector
Engineering Practices: Git, GitHub, code review, CI/CD, Docker, Linux, AWS, Vercel, Netlify, Nginx, Kubernetes
AI / GenAI: LLMs, RAG, LangChain, LangGraph, OpenAI API, prompt engineering, AI agents, evaluation

PROJECTS EXPERIENCE

SeeU Bangkok | AI Engineer / Full-StackDec 2025 – Mar 2026

- Built an AI-powered Bangkok travel planning platform with interactive map exploration
- Create AI Agent capable plan route, editable itineraries, assist user with chat.
- Designed LangGraph-based workflows for multi-agents and implemented a RAG pipeline
- Integrated frontend applications with backend APIs and Supabase services.
- Worked with technical requirements to deliver intuitive user experiences.

Tech Stack : Next.js, Hono, Supabase, LangGraph, MapBox, Docker

Meguri | Full Stack DeveloperMar 2026 - Apr 2026

- Built SmartStock, a inventory management web app using Next.js, TypeScript, Convex
- Developed real-time inventory workflows for stock movements, manual adjustments, multi-unit tracking, and low-stock alerts.
- Implemented recipe and Bill of Materials (BOM) logic to automatically deduct raw materials when finished products are sold.
- Designed multi-workspace access control with user profiles, membership roles, and workspace-level authorization.
- Added AI-assisted forecasting and purchase planning with anonymized sales data, reorder recommendations.

Tech Stack : Next.js, Convex, Tailwind CSS

Jisa | AI Engineer / Full-StackApr 2026 - Current

- Built a full-stack AI manga translation platform, supporting image uploads, job tracking
- Developed an automated manga pipeline for speech bubble detection, OCR , Thai translation through LLM APIs, inpainting, and typesetting.
- Created a human-in-the-loop translation editor with visual bubble overlays, segment-level text editing, Thai rendering preview, and approval flow.
- Implemented backend workflow controls including job cancellation, project creation, page reordering, status normalization, and Server-Sent Events (SSE).
- Improved output quality and reliability, edge blending, custom text wrapping, API type contracts

Tech Stack : Next.js, FastAPI, PostgreSQL, Tailwind CSS, OpenCV

EDUCATION

King Mongkut's Institute of Technology Ladkrabang (KMITL) | 2026

B.Sc. in Information Technology

- Relevant coursework : Software Engineering, Database Design, Web Development, System Analysis and Design, UI/UX Design

ADDITIONAL INFORMATION

- Languages:** Thai (Native) , English (Fluent), Japan (Beginner)
- Exam:** TOEIC 780
